

Patient: Patient DEID-987BAEC4 ID: PT-D00001 MRN: MRN-D00001
Age/Sex: 26 / Female Clinician: Dr. Sarah Miller
Risk: stable Language: English Encounter: 2026-06-27
Diagnosis: Type 2 diabetes with cardiometabolic complications

Clinician narrative / OCR target

Enterprise Extraction Packet: Patient DEID-987BAEC4 is a 26-year-old female with Type 2 diabetes with cardiometabolic complications. She presents for longitudinal review of symptoms, labs, medications, imaging, and care gaps. Current treatment includes Metformin; medication reconciliation status is complete. Risk level is stable with data completeness 89%. Social context: housing=stable housing, transportation=reliable, food security=secure. Care gaps: no open care gaps. Agent review focus: glycemic trend, retinal screening, medication adherence. Plan: correlate extracted document tables, recent labs, source images, and clinician notes before persistence. Packet signal: Glucose changed from 148.5 to 147.7 across 8 points. Source systems: Claims, EHR, Patient Portal, RPM, Pharmacy. Review focus: glycemic trend, retinal screening, medication adherence.

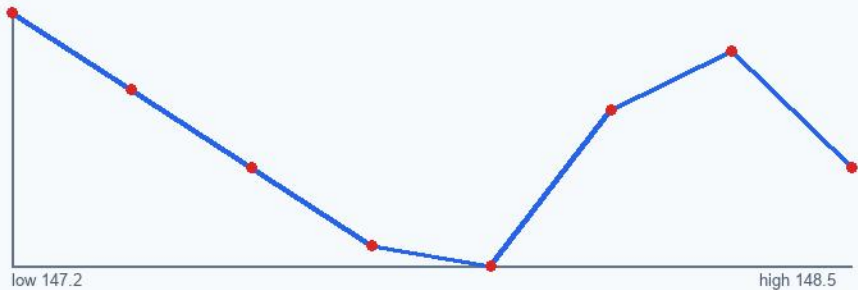

Structured extraction target

field	value	flag
Glucose	147.4 mg/dL	high
CRP	0.1 mg/L	normal
BNP	143.8 pg/mL	high
Hemoglobin	15.1 g/dL	normal
CEA	2.8 ng/mL	normal
eGFR	68.8 mL/min	normal

Cross-system context

Care archetype: cardiometabolic
Privacy class: DEIDENTIFIED
Review required: yes
Packet rule: five patients per accepted PDF source file

Longitudinal signal

Patient: Patient DEID-9F70AFA0 ID: PT-D00002 MRN: MRN-D00002
Age/Sex: 67 / Female Clinician: Dr. Miguel Torres
Risk: needs_review Language: Spanish Encounter: 2026-06-26
Diagnosis: Non-small cell lung cancer on surveillance

Clinician narrative / OCR target

Enterprise Extraction Packet: Patient DEID-9F70AFA0 is a 67-year-old female with Non-small cell lung cancer on surveillance. She presents for longitudinal review of symptoms, labs, medications, imaging, and care gaps. Current treatment includes Apixaban; medication reconciliation status is complete. Risk level is needs_review with data completeness 96%. Social context: housing=stable housing, transportation=reliable, food security=secure. Care gaps: vaccination, remote_monitoring_setup. Agent review focus: lesion growth, treatment toxicity, symptom burden. Plan: correlate extracted document tables, recent labs, source images, and clinician notes before persistence.
Packet signal: CRP changed from 29.0 to 27.0 across 8 points.
Source systems: RPM, Pharmacy, Patient Portal, Claims, Lab.

Structured extraction target

field	value	flag
CRP	29.3 mg/L	high
Hemoglobin	12.0 g/dL	normal
Glucose	63.2 mg/dL	normal
WBC	12.8 K/uL	high
Potassium	4.1 mEq/L	normal
CEA	8.9 ng/mL	high

Cross-system context

Care archetype: oncology
Privacy class: DEIDENTIFIED
Review required: yes
Packet rule: five patients per accepted PDF source file

Longitudinal signal

Patient: Declan Okafor ID: PT-D00003 MRN: MRN-D00003
Age/Sex: 50 / Male Clinician: Dr. Lina Haddad
Risk: stable Language: English Encounter: 2026-06-25
Diagnosis: Type 2 diabetes with cardiometabolic complications

Clinician narrative / OCR target

Enterprise Extraction Packet: Declan Okafor is a 50-year-old male with Type 2 diabetes with cardiometabolic complications. He presents for longitudinal review of symptoms, labs, medications, imaging, and care gaps. Current treatment includes Metformin; medication reconciliation status is complete. Risk level is stable with data completeness 82%. Social context: housing=temporary housing, transportation=reliable, food security=secure. Care gaps: medication_reconciliation. Agent review focus: glycemic trend, retinal screening, medication adherence. Plan: correlate extracted document tables, recent labs, source images, and clinician notes before persistence. Packet signal: HbA1c changed from 9.8 to 12.6 across 8 points. Source systems: Lab, RPM, Claims, Imaging, EHR. Review focus: glycemic trend, retinal screening, medication adherence.

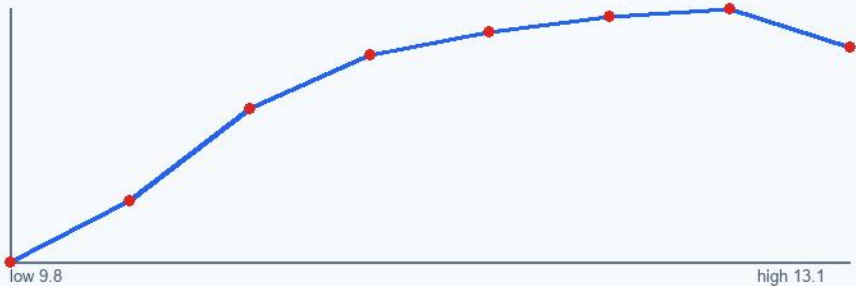

Structured extraction target

field	value	flag
HbA1c	8.8 %	high
CEA	3.4 ng/mL	high
Creatinine	0.8 mg/dL	normal
Glucose	198.2 mg/dL	high
LDL	155.4 mg/dL	high
Hemoglobin	14.0 g/dL	normal
